# DAHLIAS

CHAPPAQUA DAHLIA GARDENS  
CHAPPAQUA, N. Y.

## VISITORS WELCOME

WE extend a cordial invitation to you to visit our gardens during the season, where you will find growing, the latest introductions and novelties in

Dahlias, Delphiniums, Aquilegias, and other garden favorites. We are located on the west side of Bedford Road at the Crossway (Orchard Ridge). About half-way between Mount Kisco and Pleasantville on route 117. Thirty miles north of New York or 1 hour motor-ing distance. In September you will find a gor-geous display, all labeled

where you can examine and select them to better advan-tage than at a crowded show.

## Introduction

---

**I**N presenting this catalogue we believe we are offering herein, a collection of the finest Dahlias obtainable. Our appreciation goes out to our many friends, who have encouraged us by their patronage, and their interest in our search for the unusual in Dahlias.

We feel we are more than fortunate to be able to offer to you, stock of the most outstanding imported Cactus varieties known. These have been carefully tested, and have proved a delight to the grower. Along with these, our excellent Honor Roll introductions share the limelight, making as we have said before, a remarkable collection of prize winning Dahlias.

We shall continue our policy of sending out only the strongest, healthiest stock it is possible to produce. Prompt and efficient service is assured.

J. H. SIEBRECHT.

## MODERN DAHLIAS

There is no secret about growing exhibition Dahlias. It does not require expert knowledge. Anyone can grow them. All that is necessary, is to select good varieties and order them from a reliable grower. Start now by discarding your inferior stock, and replace them with some of the newer and better varieties. By adding a few each season you will have in a short time a good collection which you will never regret. You may leave the selection to us if you wish. Tell us what varieties you have and the amount you wish to spend.

## DAHLIAS FOR CUT FLOWERS

Dahlias when properly grown and handled will keep longer than most flowers. Cut Dahlias in the morning when the dew is still on them. The earlier the better. Never cut them during the heat of the day. Cut with a fairly long stem, remove the lower leaves and place them deeply in cool, clean water. Leave the flowers in a cool place for a few hours so they may draw water before using them.

## ROOTS

The size of the roots varies according to the variety. A large root does not always result in a large plant or flower. The essential thing is a strong, healthy field-grown root, showing a growing eye or sprout. We send no roots with broken necks. Nothing but strong, healthy roots in growing condition are shipped.

## GREEN PLANTS

We make a specialty of green plants. They are properly grown, packed well, and safe delivery is guaranteed within a radius of 1,000 miles. Plants are ready about May 1st. Although they require a little more care in planting than roots, and will not mature as quickly, yet they will give good satisfaction, and often produce larger flowers than roots. The price of plants being half the price of roots, affords many an opportunity to try out the newer introductions at a greatly reduced expenditure. We make no charge for packing and prepay transportation charges when remittance in full accompanies the order. Plant them as soon as they arrive, water thoroughly, and shade them during the hottest hours of the first few days.

## CULTIVATION

Dahlias are easily grown. They require no special treatment or soil to bring them to perfection. An open sunny situation is the best, but they will succeed in partial shade. Dig holes about three feet apart and six inches deep. Drive a strong stake in each hole, then lay the root down flat with its crown toward the stake. Cover with two or three inches of soil until after the plant comes up, then fill in the balance.

We will send full cultural directions with each order. With these you should have no trouble in growing exhibition blooms, as they give you information on every stage of growth.

## ORDER EARLY

Then you will get the varieties you want. Stock of some of the latest varieties is limited, so to avoid disappointment, we urge that you order early. All orders are filled in rotation, and stock is subject to prior sale. We will ship at the proper planting time, or whenever you desire them, if you specify the date.

## TIME OF SHIPPING

We ship roots in April and May. If this does not agree with your plans, tell us when you want your order shipped. Roots shipped before April 1st are not guaranteed against loss by freezing.

## MANY VARIETIES NOT LISTED

If you do not find the varieties you want in this catalogue, write us. We have many of which stock is too limited this season to catalog. But we will be glad to quote you our lowest prices on them.

While we list plants of only certain varieties, we will grow plants of any variety we list, at one-half the price of tubers, unless the price shall amount to less than 50c., which is the minimum price per plant. Should you desire plants we do not list, we will grow them for you if your order reaches us not later than March 1st, but would request that you send it to us as early as possible.

## NEW INTRODUCTIONS FOR 1934

### R. A. BROOMFIELD

(Petrie-Chappaqua)

#### INFORMAL DECORATIVE

Here is a new Dahlia that has come to stay. Glorious in color, vigorous in growth. It is a Petrie origination that has been thoroughly tested here in the East.

When we grew R. A. Broomfield last year, frankly, we did not know what to expect. Originated and carefully tested in California by Mr. Petrie, he sent us stock with the request that we try it out here in the East. To say we were tremendously pleased with the results, is putting it mildly.

Almost without exception, every visitor to our gardens remarked on its great beauty and sturdiness, and asked pointedly, "What's the name of that one?"

We feel great satisfaction in being able to head our list of 1934 introductions with a Dahlia of such sterling quality and beauty.

**BLOOMS** are large, distinctive, and are easily grown to great size and depth. They are held erect, well up out of the foliage.

**COLOR** a glorious saffron orange flushed with rose.

**STEMS** are always stiff, straight, strong, and not clubby.

**GROWTH** is vigorous. The foliage is dark green, of the insect resistant type. The plant is a fine clean grower, making a thrifty, shapely bush five to six feet high.

R. A. Broomfield is on the Roll of Honor. Mr. Derrill W. Hart in his story of outstanding Dahlias said: "*This Dahlia was not shown this year, but of all the new varieties no one made a finer impression on me. It is a giant of very impressive form; . . . I saw a complete row of this and I predict a great future for this variety.*"

Roots, \$10.00; Plants, \$5.00

#### CLARON (Beauchamp) Formal Decorative

An unusual Dahlia. A distinct novelty. This variety has been withdrawn to increase stock. Will be released in 1935.

#### GOLDEN ECLIPSE (Badetty) Formal Decorative

A clear golden yellow with slight blushes of salmon on some of the petals. As brilliant under artificial light as in the open. Blooms of eight to ten inches are produced on bushes 5 to 7 feet high. The stems are strong and the plant is vigorous. A good cut flower variety.

Roots, \$10.00; Plants, \$5.00

#### GRANDEE (Ballay-Success) Informal Decorative

Light nopal red shaded orange. Winner of the Achievement Medal at San Francisco and Largest Flower at the California Flower Festival. Blooms of 15 inches have been produced without forcing. What it will be like when especially grown for size, we do not know. Grandee is on the Roll of Honor. Mr. Hart says: "*Grandee is a very large flower of a striking combination of Spanish red and golden yellow. The reverse of the petals shows a blush of russet red. Great is indeed the right adjective to use here. It has individuality.*"

Roots, \$15.00; Plants, \$7.50

**EAGLE ROCK FANTASY (Informal Decorative)**

Of monster size, imposing and beautiful in form and color. Huge, broad florets tapering and tastefully notched at tips.

Here is how Derrill W. Hart describes it on the American Home Honor Roll: "This Dahlia will achieve universal acceptance. It is another wonder origination of a Dahlia wizard, who must be working along very definite lines in breeding. Clear, mallow pink, of great size and depth. It is more like Mrs. Frances E. Bullard than any variety that we can name, but an improvement on that wonderful variety in both form and color. All pink and with larger flowers. Received a Certificate of Merit at Storrs, and we saw it growing there and in its home garden. Among the finest of the 1930 Dahlias." The habits of this variety are ideal, the best of stems that are long, straight and stiff with the monster bloom set just right to look one straight in the face, the foliage is medium dark green and seems to be immune from insect attack.
